**DETAILED ACTION**

**DETAILED ACTION**

***Response to Amendment***

Examiner acknowledges response by applicant's representative received 1/30/07.

Applicant's election without traverse of claims 33-48 in the reply filed on 1/30/07 is acknowledged. A further restriction is required. See Below.

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 33-47, drawn to A Method Of Playing A Wagering Game, classified in class 273, subclass 292.
- II. Claim 48, drawn to A Method Of Playing A Wagering Game With Multiple Bonus/Secondary Games, classified in class 463, subclass 20.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are directed to related Wagering Games. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use

together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed have mode of operation, function and effect. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Art Unit: 3711

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ***Dolores R. Collins*** whose telephone number is ***(571) 272-4421***. The examiner can normally be reached on 8.00 A.M. - 4:30 P.M..
